

Christ the Light of the World International

Then Jesus spoke to them again, saying, "I am the Light of the world. He who follows me shall not walk in darkness, but have the light of life."
John 8:12

We want to thank you for your prayers for our trips and some of you are helping as the Lord gives you to help and again I say thanks. Everything is possible for those that believe and with prayer all things are done.

As some of you know we are going back to Ecuador the 1st of June and as always we would love for you to be a part of our blessing to the people in Ecuador. Many miracles have happened and many more are going to happen, pray for us that many, many, many, more blessing will come to these people there.

Due to the flooding and rain, that has drowned the crops and the food prices have gone up. We could buy a 100# bag of rice for \$20 it is now \$ 40. So it is going to cost more for this trip. We don't take offering while we are there we give as much as we can to help the people in the churches. Then the overflow goes to the rest and when we do this more people get saved, people are looking for help but when they see the Love of God, that changes the thinking.

The Associated Press

QUITO, Ecuador: Ecuador's dollarized economy has seen prices jump by more than 8 percent over the past year, roughly double the rate for the United States, officials said Thursday. Finance Minister Fausto Ortiz told Gamavision television that the government is scrapping its goal of 3.5 percent inflation for the year. The price index rose by 5.18 percent during the first four months of the year alone. U.S. inflation has been running at about a 4 percent yearly rate. Ecuador adopted the U.S. currency in 2000 to help fight inflation, which had been running at 100 percent a year, and to attract foreign investment. Ortiz said price rises were due to domestic crop losses caused by months of heavy flooding and to rising global food and oil prices. Economist Vicente Albornoz, director of a Quito-based development think tank, told The Associated Press that price rises were "basically food inflation." In addition to floods and rising global prices, he said the situation in Ecuador was complicated by government price control announcements that have discouraged producers.

Ecuador's government imposed a ceiling on milk prices in April and has warned it could do the same with other products such as flour and vegetables

Yolanda and I want to let you know, without your prayers and financial support we wouldn't be able to do as much as we do. So thank you so much. Our web site www.john812.org has been getting a lot of people reading it. It also has a way to give online, too.

Blessing to all of you and keep praying for us, and the people to receive everything the Lord has for them. We Love you all.
